Editors

Steven Jennings and Rebecca Theobald

The Colorado Geographic Alliance awarded a grant to a group of AP Human Geography teachers in Colorado for the purpose of developing an AP Human Geography test bank. During 2010 the first version of the test bank was made available. After the first year the team was charged with refining the test bank. The second version of the test bank has several added questions and features. As with version 1.0 the test bank contains a variety of teaching resources including a set of concepts based on the AP Human Geography outline. These concepts were used to develop sets of Multiple Choice and Free Response Questions for each of the units in the AP Human Geography outline. New in version 2.0 is material that supports Unit I. In this packet there are seven main files representing Units I through VII. In each of these main files, with the exception of Unit I which has no free response questions, are five files that reflect the subject matter covered in each of the units. These files consist of an outline of the unit, a list of the concepts, multiple choice questions (MCQs), free response questions (FRQs), and an answer key for the multiple choice questions. The multiple choice questions are linked to the outline. In the outline file the bolded multiple choice question numbers are associated with the ideas in the outline file. The correct answers for the multiple choice questions are in the answer key file and are in bold in the multiple choice file. These materials can be selected and copied using the right-click mouse button on your mouse and then pasted into a Word document. It is our hope that these materials are a substantive addition to your classroom. We encourage you to send your comments and suggestions to coga@uccs.edu. We look forward to your observations about this material.
