

Esri and ConnectED Sponsored a Geospatial Technology Workshop – Englewood, June 2015

Englewood High School

COGA Coordinator Steve  
Jennings provides  
instruction on using GPS  
units.

# Exploring the school grounds using GPS units

# Computers are essential for online mapping.

Lead GIS Analyst  
and Planner Andrea  
Santoro from  
Arvada company  
Plan-It Geo offers  
information about  
how GIS is used in  
small business  
applications.

# Field trip to the South Platte River.

# Lunch before data collection.

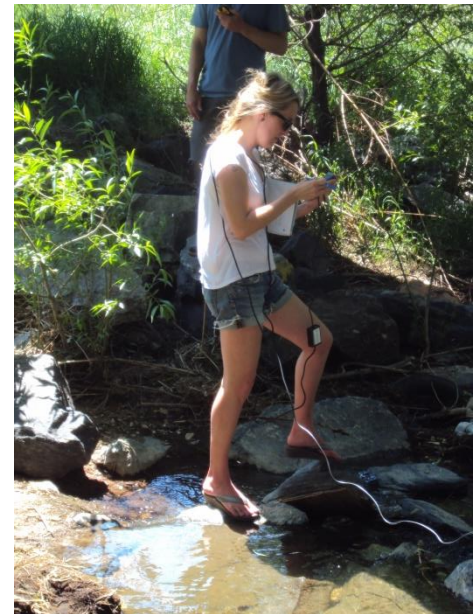

Steve Jennings  
distributes the GPS  
units.

On the bike path to count the number of ash trees.

Collecting data about stream flow.

Other groups explored the river from another perspective.

Gathering to hear reports from the groups who were investigating invasive species, safety on the bike trail, and the width of the river at various points.

Back in the classroom, John Voboril, a Long Range Planner in the Community Development Department, explains how the City of Englewood uses geospatial technology.

In the fall, students will benefit from their teachers explorations in the field and on line.
